

CASH DEPOSIT MACHINE

CASH DEPOSIT MACHINE (CDM) TO
OPTIMIZE CASH HANDLING PROCESS

FUNCTIONALITY:

Cash deposit machine safe is designed for indoor installation with a purpose to optimize the personnel work with the cash, to reduce the risks of cash storage, and creation of new competitive advantages of the banking institution in the service segment of small and medium business.

CDM is the reliable first class certified safe that allows you to use it also for the night storage of cash with no need for every day cash collection.

The compact size of CDM provides its convenient use even in the limited space of bank micro-branches, customer service points, etc.

POPULAR USE CASES:

Possible variants of use and potential users of the automated safes:

- 01 CIT companies
