

**TECHNOLOGIES AND SOLUTIONS  
DELIVERING TO BUSINESS PROCESSES****M3003  
COIN ACCEPTANCE MODULE**

COINS IN BULK -  
IMMEDIATELY TO THE BANK ACCOUNT

**FUNCTIONALITY**

To simplify the processing of a large volume of coins, we have developed a special receiving module. Just pour them into the receiver, and the device will do all the work: validating, verifying, counting, placing them in a bag, and depositing the received amount into the user's bank account or according to the specified purpose. A wide range of currency libraries will allow to quickly adapt the solution to the needs of the country and the customer.

The solution will simplify everyday transactions with the circulation of coins for retailers, logistics companies, courier services, CIT companies, as well as from the public. It will help to relieve the burden of a traditional cash desk in a bank and complement any ADM manufactured by RENOME SMART, for example, in a shopping center. In addition, it may contain the function of cashless currency exchange.

**CONNECT WITHOUT PROBLEMS**

The device is ready for use right out of the box. The installation process takes a few minutes. At the same time, it can be connected to any automated deposit machine of RENOME SMART.

receiving speed  
**up to 500**  
coins / minute

**ADVANTEGES**

**YOU CAN FILL  
IN COINS**

**INSTANT DEPOSIT TO  
THE CLIENT'S ACCOUNT**

**EASY  
INSTALLATION**

**INTEGRATION WITH E-COM,  
MARKETPLACE, ERP SYSTEM**

## TECHNICAL SPECIFICATIONS

### NUMBER OF DENOMINATIONS

from 1 to 20 types of metal coins

### RECEIVING SPEED

up to 500 coins / minute

### DIAMETER

from 14 to 33 mm

### CAPACITY

up to 5,000 coins

### SENSOR

3 electromagnetic inductive sensors

### THICKNESS

from 1 to 3.4 mm

### INTEGRATION

- Core Banking System and Transaction Switch (creating entries for Automated Banking System, transactions data uploading to back-office)
- TOMAS system (control over the installed safes, scenario scripts editing, transaction register preparation for core banking)
- X4 and X4WEB monitoring systems (remote technical monitoring, cash level control and incident management)
- TOMAS, X4 and X4WEB are the RENOME-SMART solutions for ATM fleet management and payments

### INTERFACE

- 10" touch screen with customizable GUI
- CIT interface auto start if the safe door opens
- Different features for cashiers, clients, Cash-in-Transit officers and service engineers
- Unique individual identifiers (ID) for every user/client
- Thermal printer (80 mm)

### DIMENSIONS

965 x 430 x 400 (H x D x W)
